Profile

Graduate of a Master's degree in Data Science & Big Data, I am building my career around two complementary fields: data engineering and Full-Stack development. My academic training gave me a structured approach to designing software solutions, managing data and developing applications. Serious, autonomous and eager to learn, I am looking to join a professional environment where I can apply my skills, contribute to concrete projects and keep growing as a Junior Data Engineer and Full-Stack Developer.

Education

Master's in Big Data & Data Science, Big Data specialization 2024 – 2026
FSBM – Faculty of Sciences Ben M'Sick *Casablanca*

Bachelor's in Mathematics and Computer Science (Databases track) 2023 – 2024
FSBM *Casablanca*

Scientific Baccalaureate, Physical Sciences 2020 – 2021
Oued Dahab School *Casablanca, Morocco*

Professional Experience

Internship – Data Engineering & Development Mar – Jul 2026
Marsa Maroc

- Took part in the design and management of data-focused solutions.
- Developed processes to collect, organize and exploit data.
- Contributed to improving data quality, reliability and performance.
- Implemented solutions to monitor processing jobs and detect potential issues.
- Took part in the development of a platform for managing and tracking port operations.

Internship – Development Jul – Sep 2025
Jisr

- Designed and developed features for web applications.
- Contributed to the development of user interfaces and server-side features.
- Fixed issues and improved existing applications.
- Contributed to designing solutions tailored to users' needs.

Academic Projects

Library management system built on microservices *FSBM, Casablanca*

- Designed and developed a library management application with a user-friendly interface and an architecture that eases maintenance and system evolution.

Administrative document management and verification system *FSBM, Casablanca*

- Web solution allowing citizens and administrations to submit, view and verify administrative documents in a secure and transparent way, with an intuitive interface for document management and status tracking.

Data platform for predictive maintenance *FSBM, Casablanca*

- Designed a solution that collects and centralizes data from industrial equipment in order to monitor its condition, detect anomalies and anticipate maintenance needs.

Banking transaction processing and analysis system *FSBM, Casablanca*

- Solution that centralizes and processes financial transactions to track operations, detect unusual behavior and produce indicators for activity analysis.

Skills

Development:	Java (Spring Boot), data-oriented programming in Python, distributed web architectures (microservices)
DevOps & Cloud:	CI/CD automation, containerization and orchestration of cloud-native applications
Data Engineering:	Data pipelines (ETL/ELT), deployment and monitoring of data processing in containerized environments, data flow monitoring

Certifications

- Oracle Certified Professional: Java SE 17 Developer
- Oracle Certified Professional, MySQL 8.0 Database Administrator
- Oracle Cloud Infrastructure 2025 Certified DevOps Professional

Languages and Personal Skills

Languages:	Arabic (native), French (fluent), English (intermediate)
Soft skills:	Teamwork, punctuality, proactivity, time management, adaptability
