Mohammed Yasser Rachih

Junior Data Engineer | Full-Stack Developer
Casablanca, Morocco | +212 716-972238 | yassirach17@gmail.com | LinkedIn: www.linkedin.com/in/mohammedyasserrachih

Profile

Graduate of a Master's degree in Data Science & Big Data, I am building my career around two complementary fields: data engineering and Full-Stack development. My education has given me a structured approach to designing IT solutions, managing data and developing applications. Serious, autonomous and eager to learn, I am looking to join a professional environment where I can apply my skills, contribute to concrete projects and keep growing as a Junior Data Engineer and Full-Stack Developer.

Education

Master's in Big Data & Data Science, Big Data track 2024 – 2026
FSBM – Faculty of Sciences Ben M'Sick *Casablanca*

Bachelor's in Mathematics and Computer Science (Databases track) 2021 – 2024
FSBM *Casablanca*

Scientific Baccalaureate, Physical Sciences 2020 – 2021
École Oued Dahab *Casablanca, Morocco*

Professional Experience

Personal Startup 2026 – Present
DataHub
- Designing a centralized platform to collect, organize and standardize data from Moroccan public sources.
- Setting up automated processes to retrieve, clean, transform and validate the data.
- Designing a structured storage layer and a simple access service for the processed, standardized data.
- Studying solutions for data quality control and for handling large volumes of information.

Internship – Data Engineering & Development Mar. – Jul. 2026
Marsa Maroc
- Contributed to the design and management of data-focused solutions.
- Developed processes to collect, organize and exploit data.
- Helped improve data quality, reliability and performance.
- Implemented solutions to monitor data processes and detect issues.
- Contributed to the development of a platform for managing and tracking port operations.

Internship – Development Mar. – Jul. 2024
Jisr
- Designed and developed features for web applications (front-end interfaces and server side).
- Fixed issues and improved existing applications.
- Contributed to designing solutions tailored to user needs.

Academic Projects

Library management system based on microservices *FSBM, Casablanca*
- Designed and developed a library management application with a user-friendly interface and an architecture that makes the system easier to maintain and extend.

Administrative document management and verification system *FSBM, Casablanca*
- Web solution allowing citizens and administrations to securely submit, view and verify administrative documents, with document status tracking.

Data platform for predictive maintenance *FSBM, Casablanca*
- Solution centralizing data from industrial equipment to monitor its condition, detect anomalies and anticipate maintenance needs.

Banking transaction processing and analysis system *FSBM, Casablanca*
- Solution centralizing and processing financial transactions to track operations, detect unusual behavior and produce analytical indicators.

Skills

Development:	Java (Spring Boot), Python (data-oriented programming), distributed web architectures (microservices)
DevOps & Cloud:	CI/CD automation, containerization and orchestration of cloud-native applications
Data Engineering:	Data pipelines (ETL/ELT), deployment and monitoring of workloads in containerized environments, data flow monitoring

Certifications, Languages and Soft Skills

Certifications:	Oracle Certified Professional Java SE 17 Developer; Oracle Certified Professional MySQL 8.0 Database Administrator; Oracle Cloud Infrastructure 2025 Certified DevOps Professional
Languages:	Arabic (native), French (fluent), English (intermediate)
Soft skills:	Teamwork, punctuality, proactivity, time management, adaptability
